

# Creating stunning smiles

Located within the Dr. OK Medical and Dental Centre at 1278 The Queensway is a dedicated dental team that specializes in smiles.

Led by Dr. Olena Klipitch, the dental centre's team offers Etobicoke families a full range of dental services, including general dentistry, orthodontics, implants, and dental surgery on the weekends. The centre also provides a range of high-tech cosmetic dentistry services, along with the very latest in dental rejuvenation treatments.

Family is always first at Dr. OK Medical and Dental Centre, and the dental clinic ensures that families are given royal treatment.

"For the hygiene appointments, we can schedule whole families at once, because they can be seated at once to be treated together. They save valuable family time because they're not waiting around," says Dr. Klipitch, who adds that each child who visits the centre receives a present at the end of their appointment.

Dr. Klipitch graduated from Faculty of Dentistry, Ivano-Frankivsk Medical Institute in 1993. After immigrating to Canada, she then graduated from the Faculty of Dentistry, UWO in 2004. Her team consists of two additional dentists and three hygienists who

are committed to offering their patients the best in dental care.

Dr Klipitch makes it a priority to educate patients about the benefits of proper oral care, and ensures each patient is fully aware of their treatment options.

"It's important for us to talk to the patients and explain all the options first, including risks and costs," says Dr. Klipitch. "We inform the patient so they can make an informed decision. We usually start from the hygiene appointment, and then educate the patient on procedures and treatments they may need - we leave it up to them."

Dr Klipitch's Dental Centre is excited to offer patients the latest in dental procedures, including Invisalign straightening, tooth whitening, and dental implants. Invisalign braces are clear, and barely noticeable to the naked eye. They are popular with teens and professionals.

"They are replaceable every 4-6 weeks. They achieve the same results, less expensive, less discomfort, and they look better," says Dr. Klipitch.

Cosmetic procedures like tooth whitening are performed using the latest and safest techniques, helping patients achieve their desired results without

the discomfort.

"Instead of putting whitening strips on and making your teeth sensitive to the point where you can't eat or drink anything for days, you can come in for an advanced procedure that will take 45 minutes and do the job in a way the strips can never do," says Dr. Klipitch.

The centre also offers componeers, a new product that can be used by a dentist to assist in placing a direct composite resin veneer. A componeer is a pre-formed surface with all of the artistry built in. It can improve the final surface and shorten the time needed to place a direct composite resin veneer. These veneers can be placed at fees that are very affordable for many more people today.

Porcelain veneers are considered to be the most durable and long lasting of veneers, but composite resin veneers have some advantages. They are resilient, and will absorb stress. They require minimal or no tooth reduction. They can be easily repaired and will not wear away opposite tooth structures. They can be placed at a lower cost and the aesthetic results can be controlled by the provider of the treatment. A well placed composite resin veneer can be expected to last 5-10 years or longer. The dense and durable surface of the componeer may help provide a longer lasting and more stain resistant veneer.

Patients of the Dr. OK Dental Centre can take advantage of the convenience that comes with so many services offered under one roof. Just across the hall, Dr. Klipitch's husband Dr. Oleg Klipitch can easily compliment cosmetic dental procedures with the detailed cosmetic work he performs.

"We have a whole-person approach to making people look and feel better, healthier, and younger. We combine our skills," says Dr. Oleg Klipitch. "I do very specific botox injections, with my fine tuning I can lift the bit of skin under the nose and the corners of the mouth - minor adjustments that make you look a lot younger."

Dr. Olena Klipitch's Dental Centre is located at 1278 The Queensway. For more information, or to book an appointment, please call 416-848-9790.
